Quarterly Activities Report and Appendix 5B For the Quarter ending 31 March 2014

The Board of Eclipse Metals Limited (“the Company”) is pleased to provide the following commentary and Appendix 5B.

During the quarter, the Company focused on landholder notifications permits as part of the statutory obligations for the purposes of conducting ground exploration over the Manganese and Iron project areas in Queensland along with initial discussions with the Northern Land Council over the granting of the West Arnhem Uranium Project tenement application in the Northern Territory. Further data reviews over the Northern Territory iron projects were also conducted as part of planning future exploration programs.

Northern Territory Projects

The Company engaged in initial discussions with the Northern Land Council in relation to scheduling native title meetings with the Traditional Land Owners over the West Arnhem Uranium projects. The meetings must take place before a granted status is issued by the Northern Territory Titles Department as they lie within Aboriginal freehold land. An exploration deed must be reached between the Traditional Land Owners and the company to provide access and permission to conduct ground exploration activities targeting the areas identified.

The Company’s focus will be on the Devil’s Elbow uranium-gold-palladium prospect located within ELA27584. This yielded high grade surface uranium assays of **3.2% U₃O₈**, **3.7% U₃O₈**, **4.40% U₃O₈** and **5.8% U₃O₈**, with **38.1 g/t Au** and **28.02 g/t Pd** related to fractures within altered amygdaloidal basalt of the Nungbalgarri Volcanics. Abundant strong untested radiometric anomalies are hosted within the Gumarrimbang Sandstone which is considered prospective for unconformity related uranium mineralisation associated with gold and palladium.

A desktop study and data review of the West Bachelor Iron Project highlighted the highly prospective nature of the Mt Tolmer and Tabletop Iron prospects situated in the Northern Territory.

The Mt Tolmer historical rock chip sampling program yielded iron assay up to **61.8% Fe** from surface, with 20% to 40% Fe from the Tabletop prospect. Historical metallurgical studies conducted during the 1970's on samples from the Tabletop Prospect indicate that magnetic beneficiation of the iron mineralisation appears feasible.

The Northern Territory tenements, both granted and under application, covering areas prospective for uranium are now the subject of an approach for joint venture or acquisition. Negotiations are on-going.

Exploration Licence Applications 24862, 25998, 25999, 26000, 26001, 26002, 26003 and 26004 held in the Northern Territory were relinquished based on a data review which indicated a lack of mineral prospectivity.

Queensland Projects

Based on the detailed data review, announced to the market during the last quarter, on gold projects in Queensland, the Company sold the Yellow Jack (EPM 17321) and Devils Mountain (EPM 17685) Projects to Laura Exploration Pty Ltd. The ASX announcement was released to the market on 14th April 2014.

Landholder notifications over the Mary Valley Manganese and Moonford Iron Projects were issued by the Company as part of statutory obligation under the Queensland Mining Act, required to be completed prior to commencement of the geological reconnaissance program.

Corporate

The following changes were made to the Board during after the Quarter:

Mr Pedro Kastellorizos was appointed as an Executive Director as of the 3rd April 2014.

Notes

- 1 The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.
- 2 The "Nature of interest" (items 6.1 and 6.2) includes options in respect of interests in mining tenements and petroleum tenements acquired, exercised or lapsed during the reporting period. If the entity is involved in a joint venture agreement and there are conditions precedent which will change its percentage interest in a mining tenement or petroleum tenement, it should disclose the change of percentage interest and conditions precedent in the list required for items 6.1 and 6.2.
- 3 **Issued and quoted securities** The issue price and amount paid up is not required in items 7.1 and 7.3 for fully paid securities.
- 4 The definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report.
- 5 **Accounting Standards** ASX will accept, for example, the use of International Financial Reporting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.
